

# THE ARRIS AUTHORIZED REFURBISHED CPE LICENSE PROGRAM

We are pleased to announce that Adams Cable Equipment has been selected to be an authorized reseller of refurbished ARRIS customer premise equipment (CPE).

As of February 1st, 2019, ARRIS launched a new program to help meet strong customer demands for reliable, refurbished customer premise products. ARRIS has entrusted ACE as an Authorized Refurbished CPE Licensed Partner and is committed to assisting ACE with introductions to Service Providers that are seeking to resell field pulls or excess CPE.

ARRIS will provide ACE with the authorized software licenses for each refurbished product and access to the latest firmware, equipment and processes needed to test and upgrade equipment. Although, ARRIS does not provide any warranty or support for refurbished products sold through this program, ACE will offer a two year warranty on all CPE sold. Adams Cable Equipment will stock and resell the products to customers throughout North America, the Caribbean and Latin America. ARRIS will maintain a record of the ownership for software license tracking purposes.

**Please contact your ACE Account Manager for more details.**

**We look forward to meeting your 2019 goals with cost effective solutions.**
